PROFILE SUMMARY

Software developer with expertise in HTML, CSS and Javascript and experience spanning SaaS environment, software engineering, front-end development, and full stack web applications development. Excellent deep-dive problem-solving skills and ability to communicate and engage with stakeholders at all levels. A team player, with a passion for continuous self-learning, who can work independently and take ownership of tasks.

EXPERIENCE

Upskilling in frontend development | Apr 2022 - Present
- Building real-world apps and implementing front-end designs(from online challenges) on the web and hosting on github.
- Self-learnt and developing apps with frameworks like React.js, node.js.

Full-stack web development – Le Wagon, Amsterdam **|** Jan 2022 - Mar 2022
Projects undertaken during training:
- Designed, implemented, and shipped apps to production from scratch, including a clone of AirBnB following coding standards.
- Collaborated with dev teams on Github and covered code with automated testing, code review and continuous integration.

Relocated to The Netherlands Jun 2021

Facilio – Chennai, India **|** Aug 2019 – Mar 2021
SaaS - AI-based, real estate data-driven management solution for global enterprises
PRODUCT MARKETER
- Collaborated across functions like product, onboarding, pre-sales, and engineering to avoid potential delays in shipping deliverables and ensured sales teams provided customers with on-time content to further the sales cycle and win customers fast.
- Rapidly ramped up the production of sales collateral by >100%, including case studies and product videos, and strengthened thought leadership content resulting in a 200% increase in monthly SQLs and market recognition.
  Awarded performance-based ESOPs (Employee Stock Ownership Plan)

Inception Business Services – Chennai, India **|** Jan 2018 – Apr 2019
New-age marketing services firm with around 100 clients across industries
WEB DEVELOPER
Technical POC (point of contact) for customers.
- Independently managed the web development tasks for clients and provided technical marketing solutions to clients including website enhancements, and backend maintenance.
- Executed projects in collaboration with UX/UI designers by translating designs into functional web pages and sites.
- Facilitated new channels of revenue through web development services, a new business stream with an immediate impact on increasing revenue with continuous on-the-job learning and growing.

Maternity leave

Polaris Consulting & Services (now <u>Virtusa</u>) – Chennai, India **|** Oct 2011 – Aug 2012
IT services and consulting company
ASSOCIATE CONSULTANT
Hired as part of the development team for a large-scale data migration project.

- Maintained and enhanced loan disbursement module by developing, testing, and driving on-time delivery of implementation code
- Managed ad-hoc enhancement/issue resolution requests from clients.

Maternity leave

<u>Infosys technologies Ltd</u> – Chennai, India **|** Jun 2006 – Jun 2009
Global leader in next-generation digital services and consulting.
SOFTWARE ENGINEER
Maintained and enhanced projects/software as requested by clients, implementing SDLC activities such as development, testing, implementation, and support activities.

- Managed ad-hoc enhancement/issue resolution requests from clients.
- Participated in Knowledge Management activities and interfaced with internal teams to ensure high quality deliverables while ensuring adherence and compliance to all processes and quality parameters.
- Led troubleshooting, investigated and fixed bugs and other issues, and updated program codes throughout the production lifecycle.
- Proactively created various documents in the project including user-guide and know-how documents.

Received 'Spot Award' recognizing outstanding performance and appreciation by client for diligent work on "Mechanized Scorecard" project.

I love the sense of satisfaction from cracking a problem and enjoy the freedom to try and explore different methods to arrive at a solution amidst a knowledge-sharing team – delivering results gives me a sense of accomplishment and keeps me motivated.
